

LEARN MANIPULATED POINTELLE

**MACHINE KNIT
WITH KNIT-1**

Manipulated Pointelle

Manipulated Pointelle

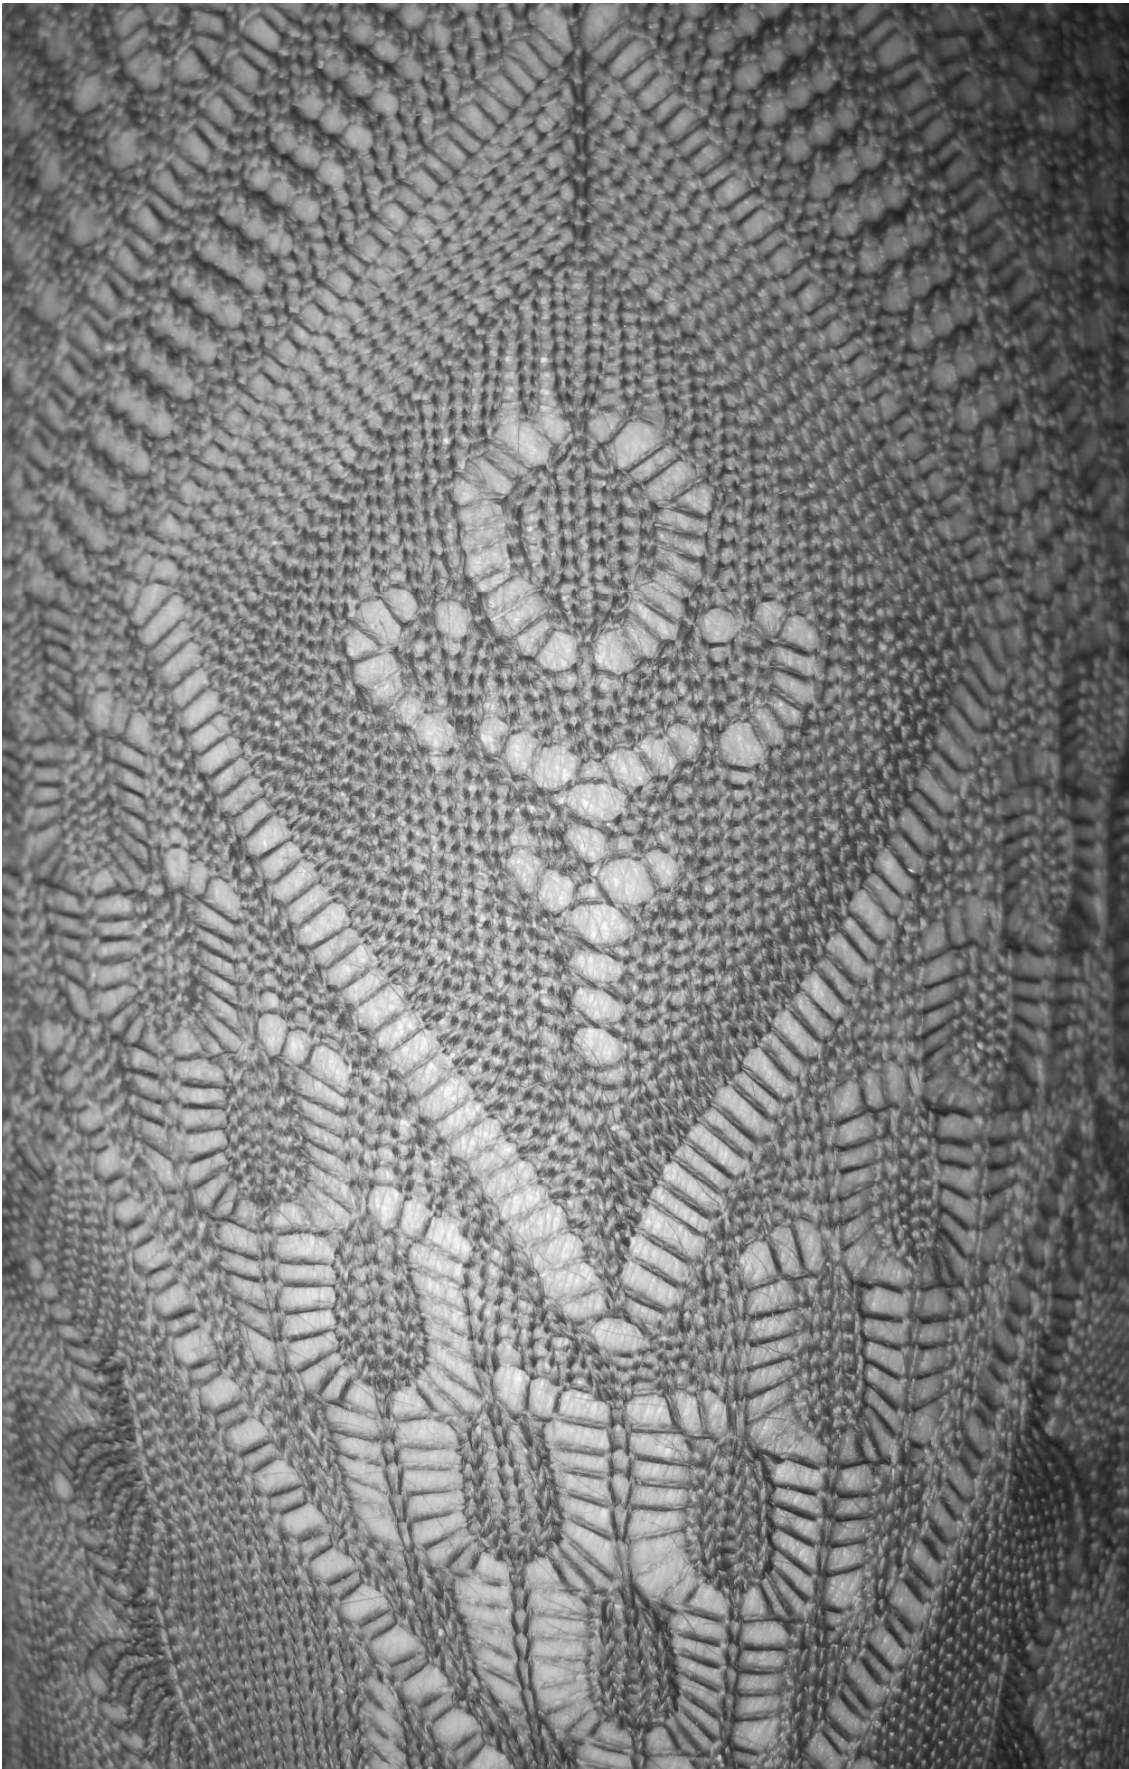

This book includes:

- ❖ Transferring stitches, basic fully fashioning.
- ❖ Scallop edge.
- ❖ How to make pointelle in square, diamond and circle shapes.
- ❖ How to make these into repeat patterns.
- ❖ Diagonal lines. Zigzag/chevron patterns.
- ❖ Giant eyelets, 2,3,4,5, st.
- ❖ Holding cam techniques to make slashes.
- ❖ Graphic pointelle.
- ❖ Ladders, travelling ladders.
- ❖ Making very open fabrics and deconstructed knits.
- ❖ 12 Fully explained techniques.
- ❖ 58 Design/swatch examples.

Provides historical and fashion examples to enhance understanding and application to contemporary design.

“You can come into the course with little to no experience and come out with the skills to become a professional knitwear designer”- Yin, London June 08

Published by FASHION TEXTILE PUBLISHING

Inspiration

The most obvious feature of Pointelle is its open space made by eyelets or ladders. You may also know this as lace knitting. It also consists of lines and solid areas. Consider all three when you design your own patterns.

Your machine may have come with a lace carriage and punchcards but unless you want to knit huge swathes of fabric of regular patterns you will not be using it to learn about pointelle.

- ❖ Patterns found on vintage hosiery are pretty and sometimes complex but are plentiful for inspiration.
- ❖ You can use historical textiles like these for inspiration for your designs; you can also interpret elements of them into more contemporary designs using clever yarn selection, new patterns or new placements of classic, old patterns.
- ❖ Lace is a classic fabric with many different looks;
It can be pretty, geometric, floral or use it as a hole!
It's not pretty- it's a hole, a rip, a slash therefore a little more contemporary.

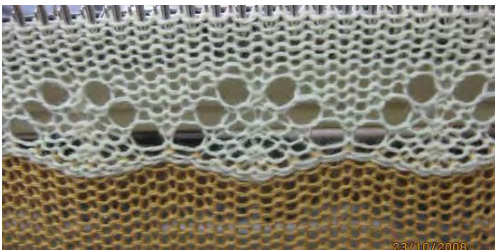

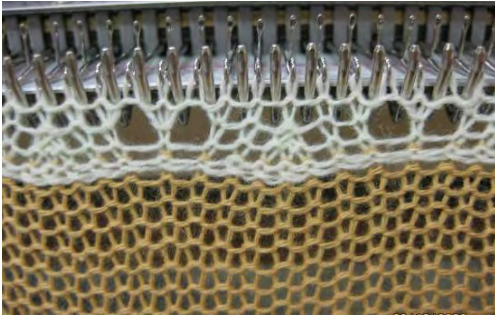

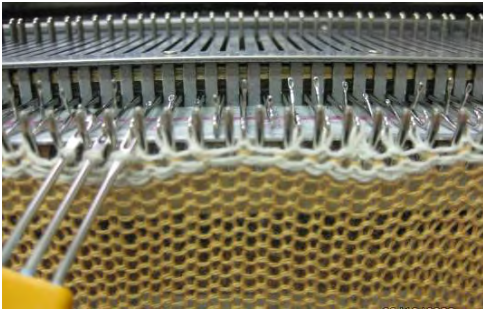

First you must master the technique and understand how the eyelet, the line and the solid area are created.

A collection of vintage lace and hosiery make a good starting point as inspiration!

A simple, classic scallop edge

- ❖ Cast on in waste yarn (orange) change to main yarn (white) E wrap over the top.
- ❖ Knit 2 rows.
- ❖ Count your needles into groups of 8 starting at either side of knitting.
- ❖ With your three pronged tool move stitch no. 2, 3, and 4, onto st.5.
- ❖ Then move 6, 7, and 8, also onto st.5.
- ❖ So st.5 has three stitches at once.
- ❖ Knit 2 rows.
- ❖ Now using two pronged tool transfer st. 3, 4, onto st.5, then 6, 7 also onto st.5.
- ❖ St.5 holds three stitches again.
- ❖ Knit 2 rows.

Finally, using the single prong tool,

- ❖ Transfer st.4 and 6 onto st.5.
- ❖ Knit 2 rows.
- ❖ Notice how the edge is curving due to transferring onto the centre stitch.
- ❖ Take off the waste yarn, steam and you have made a pretty scallop edge!

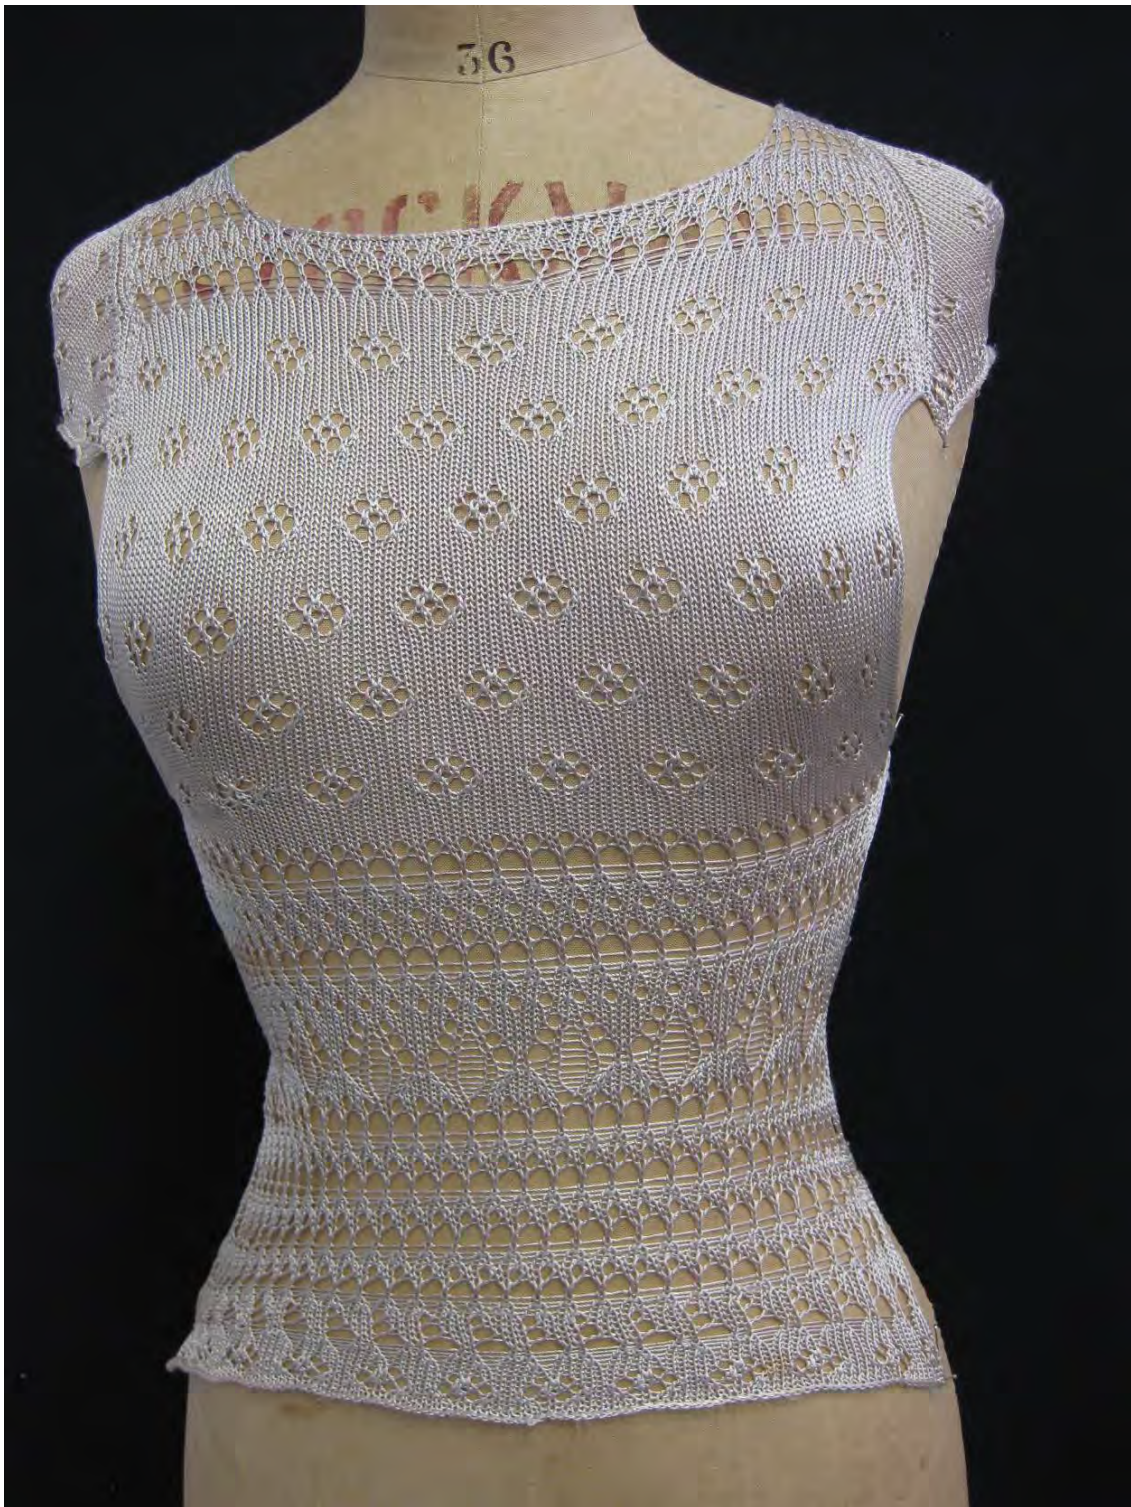

- ❖ Now you have mastered moving groups of 3st try 6 and 9.
- ❖ Try a sample that is stripy (just two colours) make scallops edge as above, repeat the process as you continue up the swatch and watch the stripes move!
- ❖ Using the three prong tool to move stitches like this is basic fully fashioning.
- ❖ If you look at the right side the centre stitch (5) that you moved stitches onto it is more pronounced than the others- this is the line.

Edge Variations

Some are knitted recently, some vintage and some woven and to be interpreted into beautiful edges.
So you can now make an eyelet, a scallop edge and some variations.

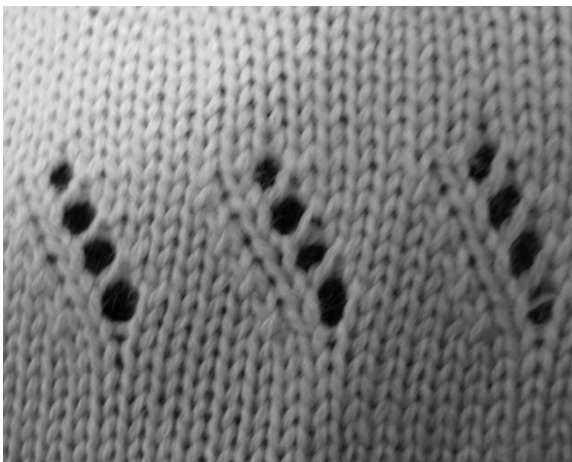

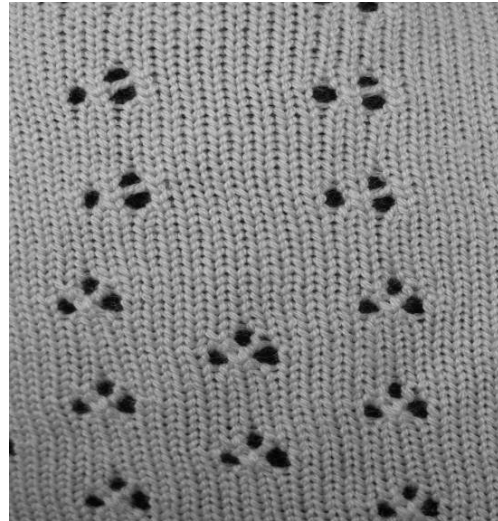

Now we are going to make regular patterns out of these simple moves.

- ❖ Make a square.
- ❖ Use your one prong tool.
- ❖ Make sure they are an equal number of sts. apart.

- ❖ Make a triangle out of eyelets.
- ❖ Make a repeated pattern out of these shapes.
- ❖ Space them differently
- ❖ Make a diagonal mark as in the photo below

- ❖ Use the three prong tool and 'fashion' the eyelet.
- ❖ Move three stitches across one stitch.
- ❖ So you make both the eyelet and the fashioning line.

- ❖ Use what you have learnt with these few simple shapes to make a repeat pattern.
- ❖ Or the opposite; try a swatch with all three of these techniques sporadically placed.

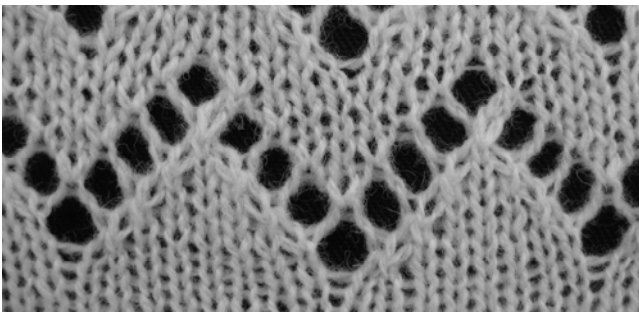

In this example, on the left, the diagonal mark of eyelets has been used as a stripe with plain knit.

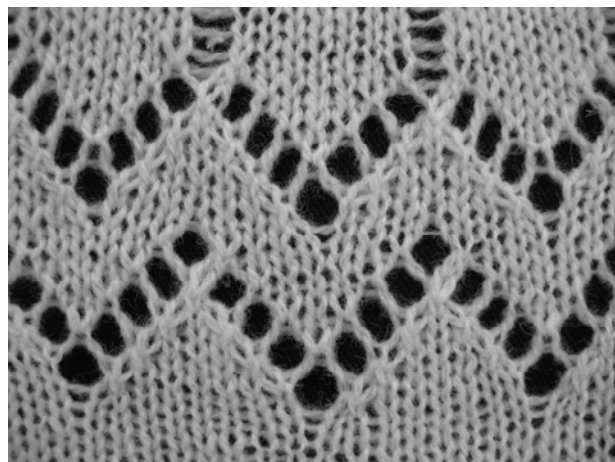

Try and copy this vintage example for practise.

Zig Zag

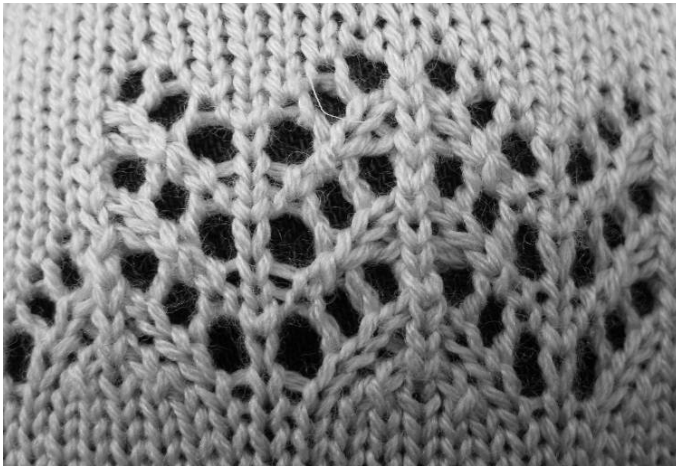

- ❖ Try now to make a zigzag row of eyelets.
- ❖ The key is to count the stitches so they are evenly spread - usually with an odd number to provide a centre stitch.

- ❖ For the picture above you need an 8 st repeat.
- ❖ The fourth stitch becomes your centre stitch. Transfer the sts. towards the centre.
- ❖ Use the one prong tool.
- ❖ Make an eyelet every 8th stitch.
- ❖ Knit 2 rows
- ❖ Transfer the stitches on both sides of the first eyelet, left to left side-right to right side. Knit 2 rows
- ❖ Transfer the next sts towards the centre. Knit 2 rows.
- ❖ Finally the 4th or centre stitch.

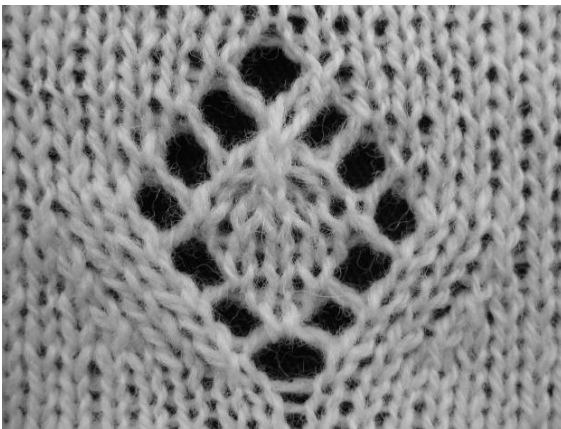

- ❖ For the photo above simply repeat the zigzag up the swatch.
- ❖ Note you are making a zigzag of open space and of solid area.

- ❖ For the photo above, use all the tools -as in the scallop edge.
- ❖ Instead of just transferring one st. you move 3,2,1 into the centre st. just like the scallop and immediately repeat. So 'fashioning' the stitches.
- ❖ Try a swatch combining these zigzags.
- ❖ Vary the width of each zigzag- so try a 12 stitch repeat, then 18 e.t.c.

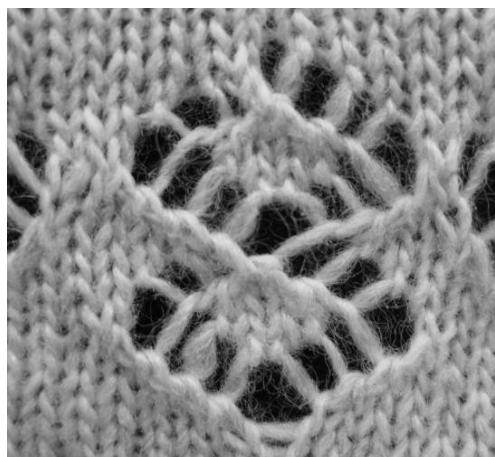

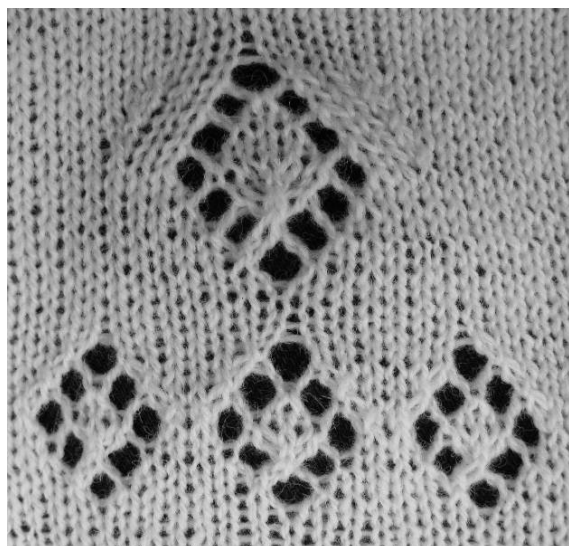

Diamonds

- ❖ Start as if to make a zigzag
- ❖ Use your 3 prong tool and fashion.
- ❖ When you have made 3 eyelets away from your first stitch, fashion back in the opposite direction and make a diamond.

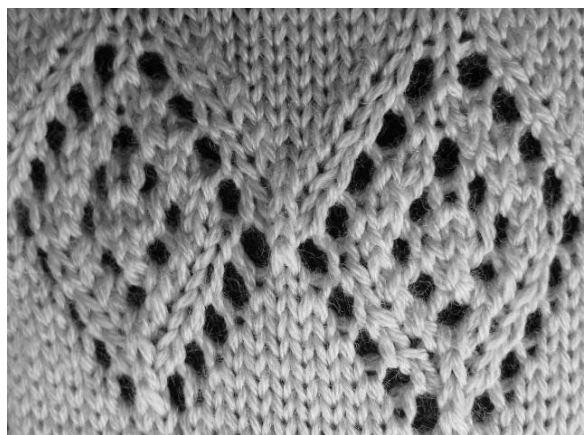

- ❖ Practise different sizes of diamonds.
- ❖ Try lining the shapes up closely in horizontal and vertical columns. Take note of the solid area as well as the eyelets.
- ❖ Make diamonds into a motif.

❖ Now try to put a diamond within a diamond.

❖ Use the 1 prong tool, start as a usual diamond then as soon as you have 3 st. in the centre begin the inner diamond.

❖ Try to make a more circular shape.

❖ Knit just one row in between eyelets rather than two.

These are examples of shapes outlined with pointelle lines.

You could find a vintage example of lace knitting and if not already knitted in pointelle - interpret its stitches into knit.

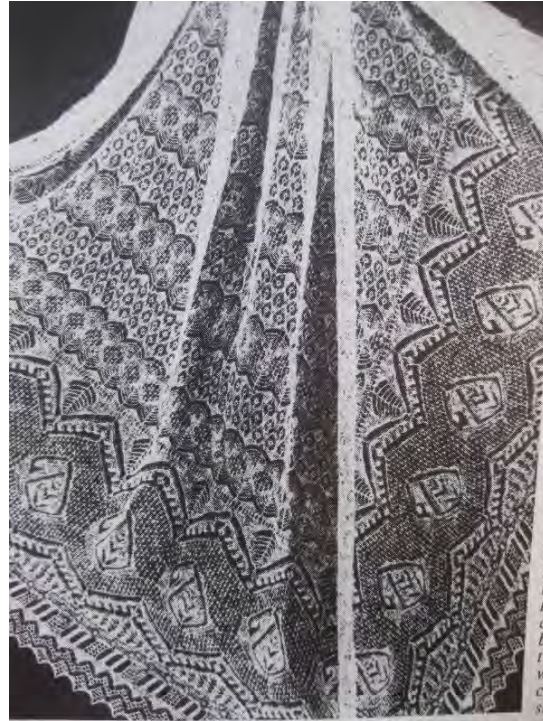

Or you could manipulate the pointelle patterns you have made by adding embroidery.

- ❖ Use the same yarn and add French knots (as in this example above left) or thread some cord or rouleaux through some of the eyelets.

Traditional lace knitting such as these Wedding ring shawls are excellent for reference. They are so named as they were knitted from yarn so fine they could be threaded through a wedding ring.

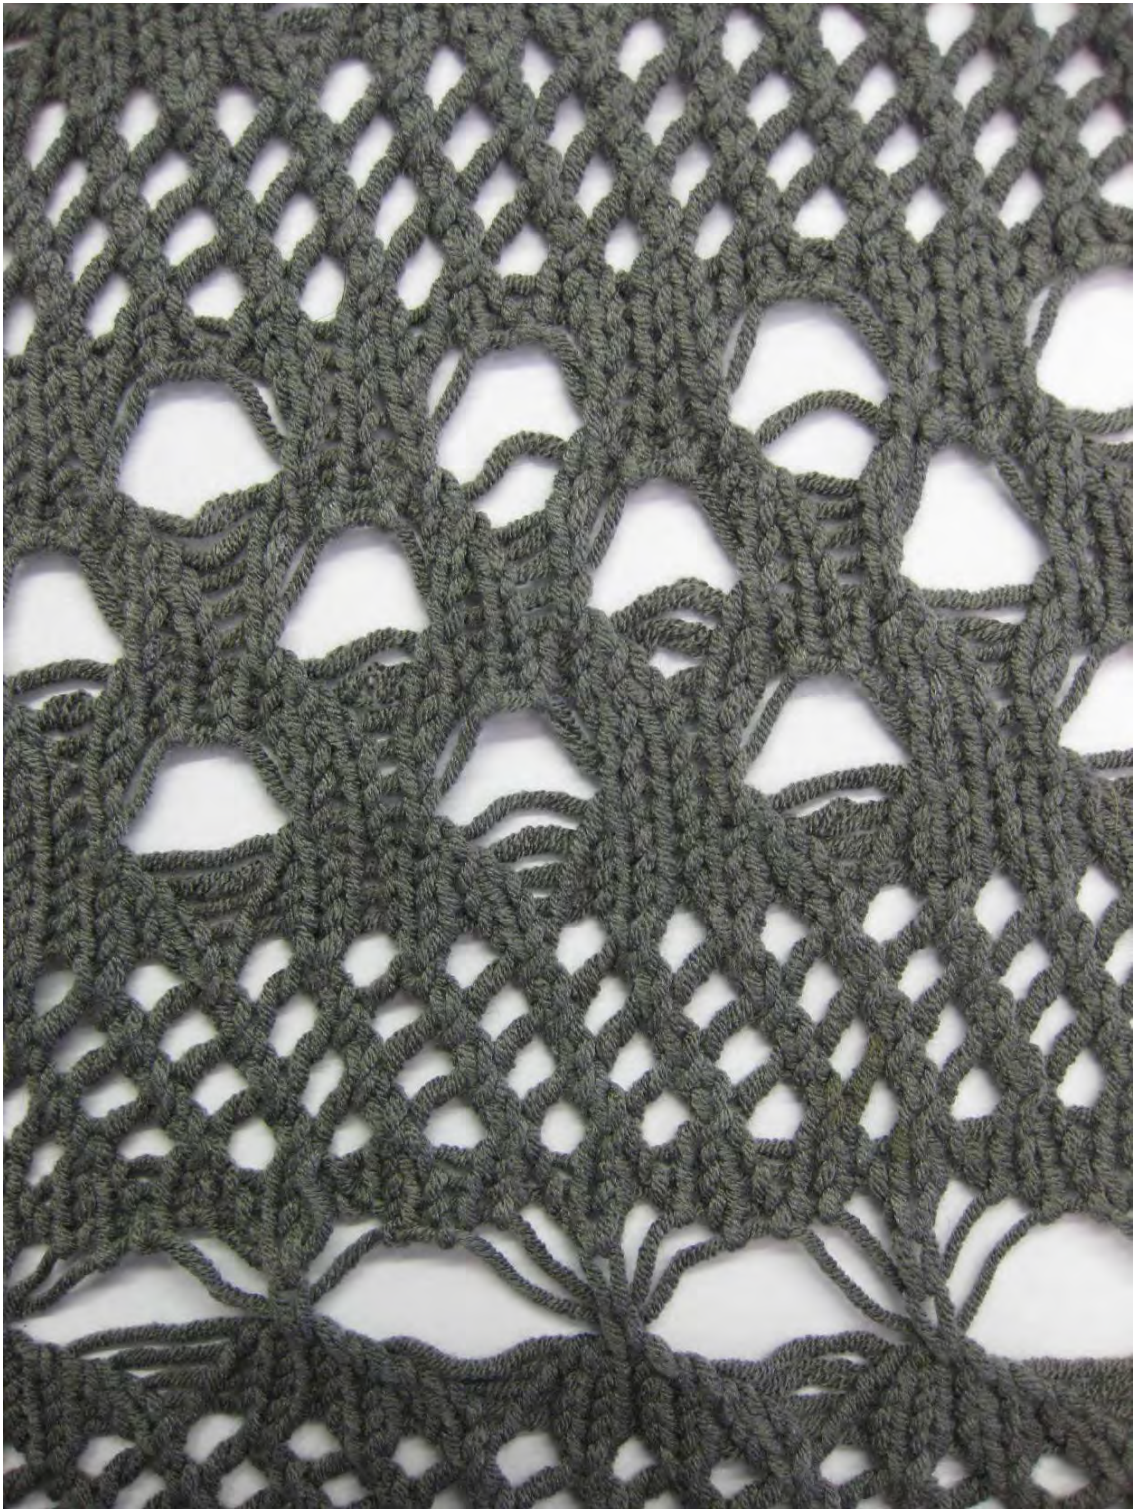

- ❖ This is a heavier copy but see the combination of beautiful stitches and fringe used to edge the main body of the shawl.

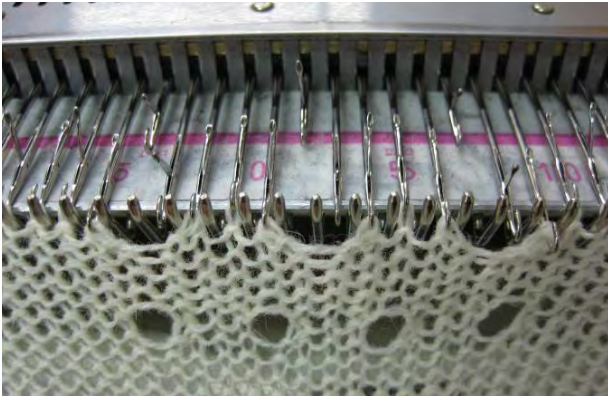

Try using the most interesting patterns/shapes you've found and make an edge out of them.

So as soon as you cast on start pointelle and make a pattern for say 30 rows then plain knit for the rest of the swatch.

Eyelets of 2/3/4/5/ stitch

So far we have only made eyelets of one stitch width and one or two rows tall.

Knit a row of one stitch eyelets then

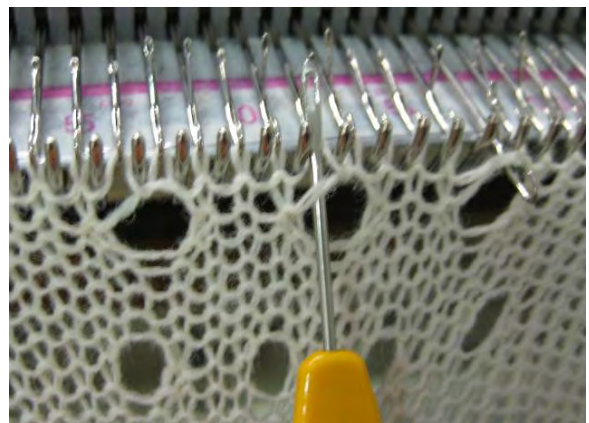

- ❖ Make a two stitch eyelet.
- ❖ Transfer one stitch onto needles either side or two stitches to one side.

- ❖ Put one of these needles back out of action in position A, leave one in position B.
- ❖ Knit 1 row and your knit should look like photo.

- ❖ Pull your second stitch back into action.
- ❖ Knit another row back and it should look like photo underneath.

- ❖ You can use this shape if you like, so carry on knitting from here
- ❖ OR... neaten it into a fully rounded eyelet by hooking up the ladder with your tool.

- ❖ Hook both ladders up onto second needle of eyelet and knit 2 rows.

Your two stitch eyelet.

NOTE. We pulled the stitches back into action one by one row so they each catch a loop to knit, if you pulled them both out at once they will only ever form a ladder

❖ Now try 3 stitches.

- ❖ Transfer 1 st. to the next needle on the right. 2st. to the left so you have a gap of 3 st.
- ❖ Push 2st out of action leaving 1st in pos.B

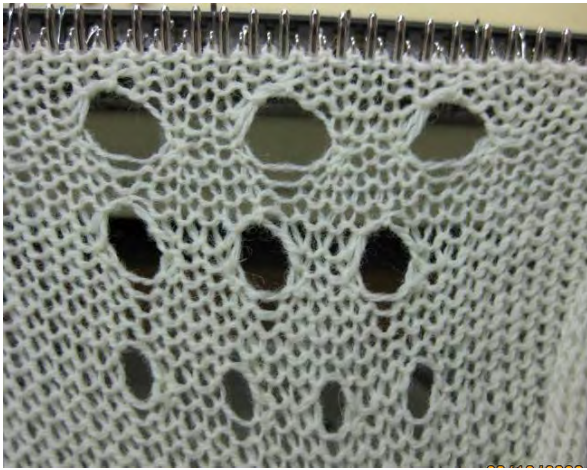

- ❖ Knit 1 row and pull one needle forward into working position.
- ❖ Repeat until all three have a loop/stitch.

- ❖ Again you can use this if you like the look, but for a round eyelet hook up all 3 floats with the tool as in the photo.
- ❖ Knit 2 rows.

❖ Now you know the procedure try a 4st. hole.

❖ Try a sample where the placement and size of hole is very regularly increasing.

❖ For any bigger than this you must cast off the stitches in the hole.

❖ Use separate yarn and cast them immediately back on with an e-wrap.

❖ This will produce a slit.

- ❖ Examples of sixteenth century slashed breeches and a contemporary design with slits.

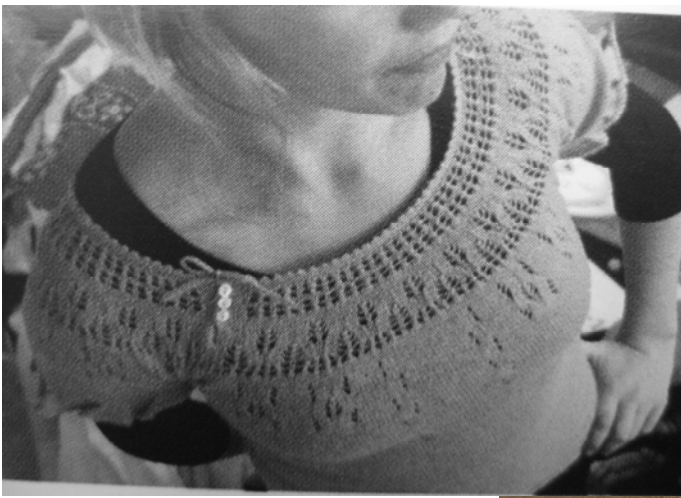

Make it Contemporary

- ❖ Fashion your eyelets and ladders to follow the contours of the body

Think about the placement of your pointelle on the body!

- ❖ Use it only around the neckline, for example

- ❖ Change the direction of your stitches.

- ❖ Or try patchworking some of your experiments together on the machine.

- ❖ Use lots of plain knit areas and make interesting edges!

- ❖ For a very modern take on pontellie look at Catwalk designers such as Mark Fast, Sonia Rykiel, Issey Miyake who create giant slashes and large pointelle holes!

- ❖ Try interpreting the traditional patterns you learnt at the start maybe a regular pattern like this - but substitute the eyelets for the bigger 3 and 4 stitch eyelets.

Here I have used the holding cams to:

- ❖ Put all needles apart from first 5 sts. in **HP**.
- ❖ Knit 20 rows on these sts.
- ❖ Put these in **HP** put next 5 in **WP**. Knit 20 rows on these.
- ❖ Knit 2 rows of 4 st. holes and repeat.
- ❖ Then combine with standard 1x1 pointelle and plain knit.

- ❖ Put the pieces on a dress form.

To make super- contemporary 'lace', combine different sizes of eyelets.

Graphic Pointelle

This is a different way to use pointelle.

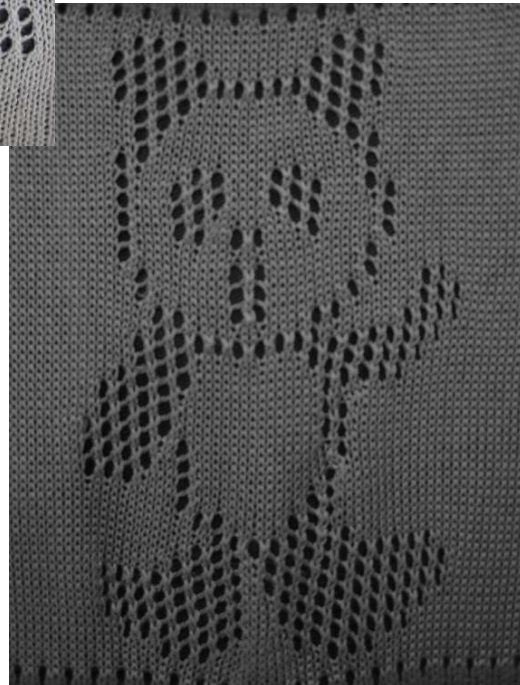

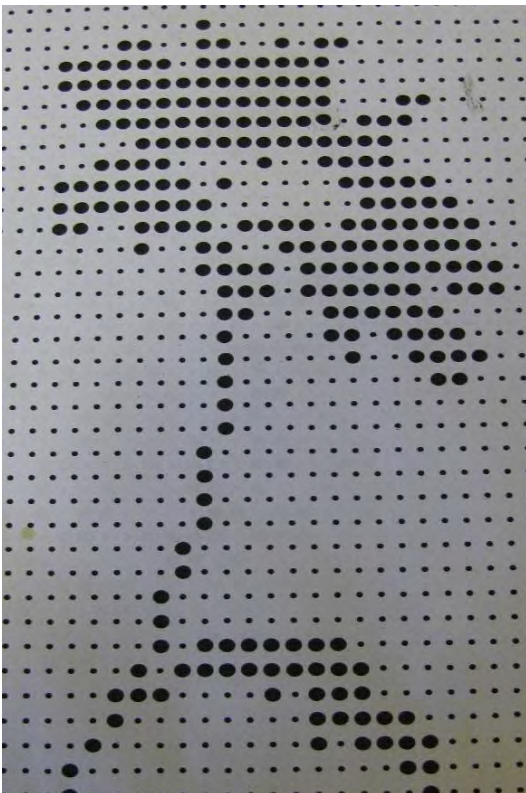

Just using pointelle in lines is a more graphic 'look' than the pretty, traditional lace patterns already tried.

❖ Try writing something in pointelle marks- your name for example.

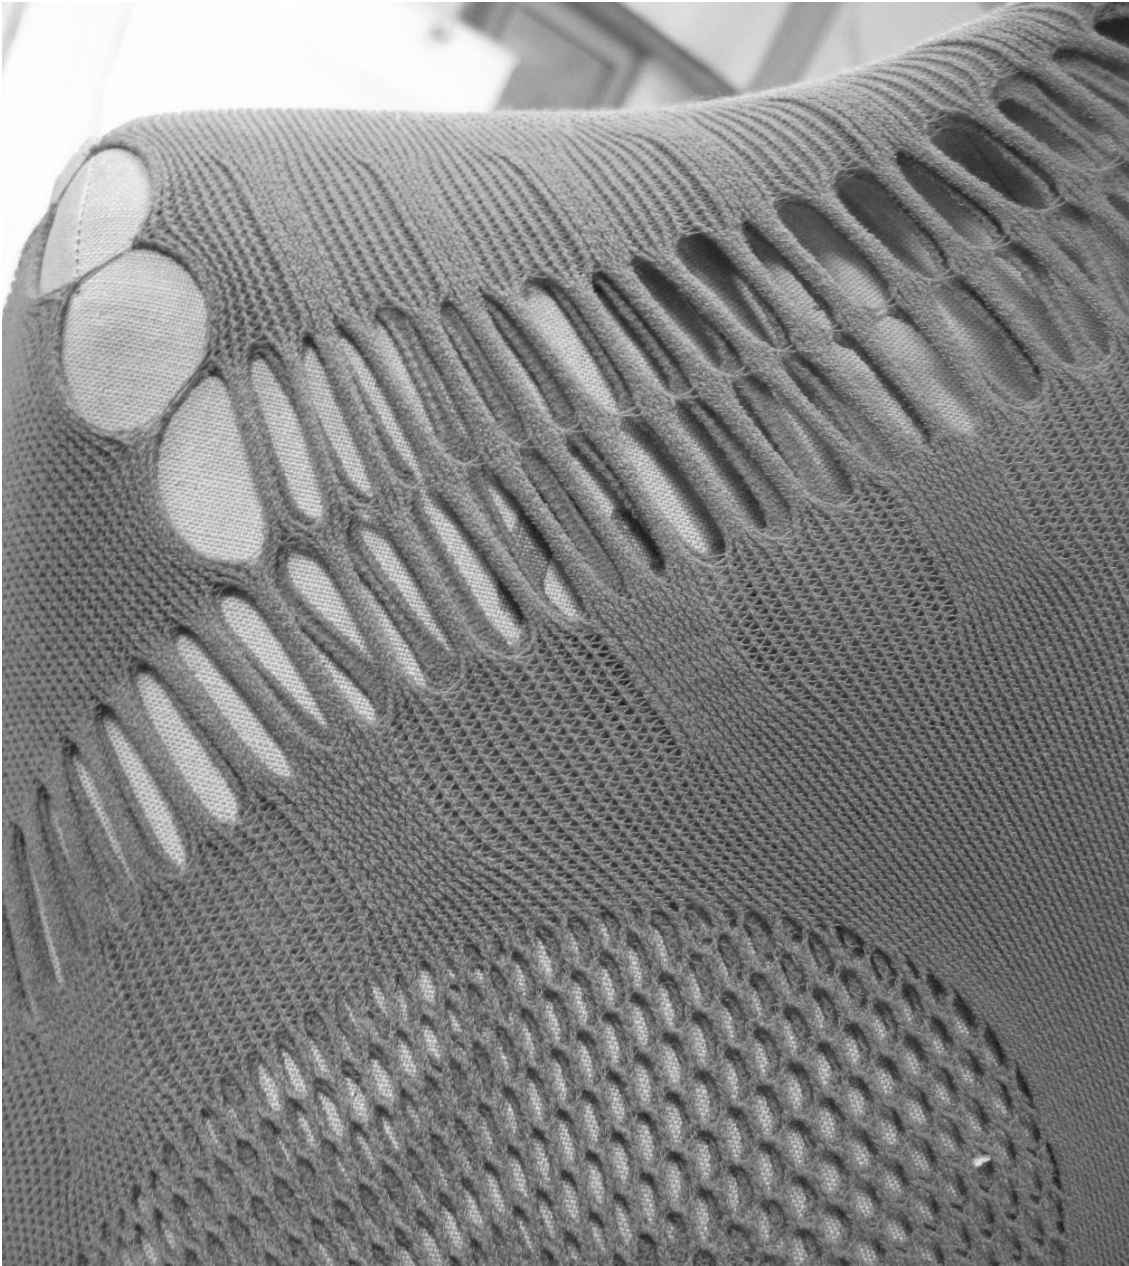

(Plan it out on paper first – remember it knits backwards!)
And try different fonts.

❖ Draw a motif in eyelets.

❖ A floral is a classic fabric maybe try drawing a flower head in eyelets, here I've taken a photocopy of a punchcard- take each dot for an eyelet and re-create in knit.

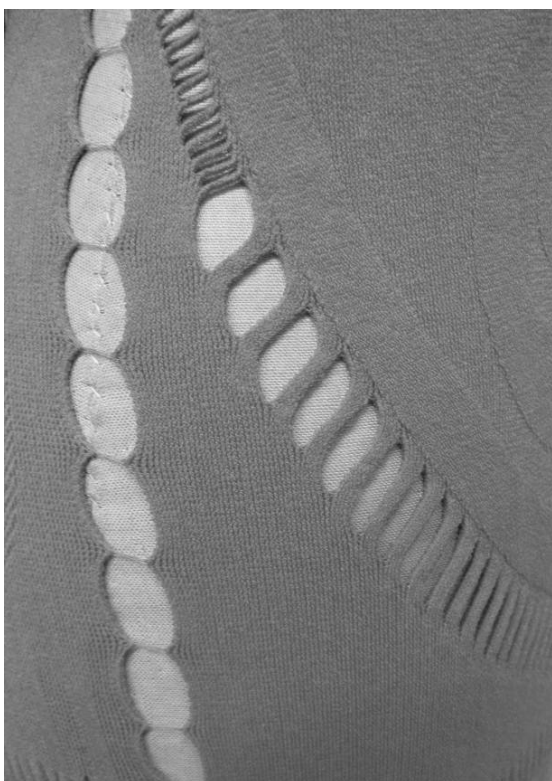

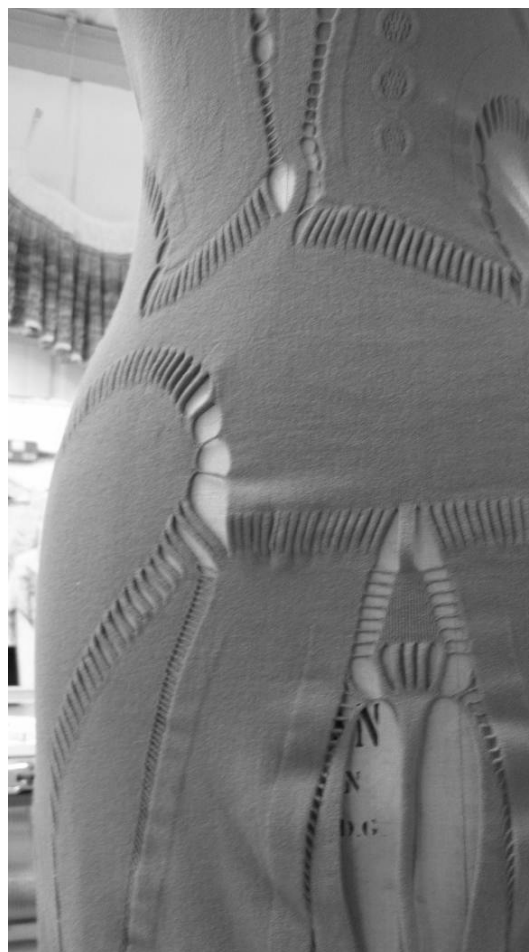

❖ Try drawing freestyle with eyelets.

The photos below are detail of an Issey Miyake A.P.O.C garment, with very graphic pointelle shapes and slashes.

- ❖ You can re-create this look with the holding cam as on page 16, with slits (casting on and off) and with larger eyelets.

You can also take stitches out of action into non working position which will form a ladder.

Ladders;

- ❖ can travel just as pointelle,
- ❖ are quick to knit as there is less transferring than pointelle.

So, we have made lace from transferring stitches; now let's look at making lace from dropping stitches.

Ladders

Again, with ladders it is not only the spaces that make a pattern but the solid areas as well.

- ❖ Make a ladder by transferring stitches out then pushing the needles back into non-working position and knitting.

- ❖ Make your ladder wider and narrower as you knit and knit several simultaneously.
- ❖ Make a shape with a ladder in its centre- any shape you like,
- ❖ Now make a repeat pattern out of it, both horizontally and vertically so you have spaces, lines and solid areas.

What happens if you hook up the floats left across your shape? As you did for the bigger eyelets, simply hook up a group of ladders on to a needle and knit in.

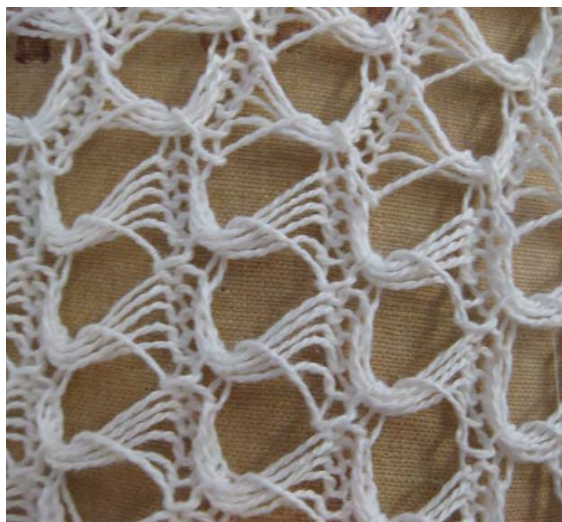

❖ View from purl side.

View from plain side.

- ❖ Try hooking up in a regular pattern.
- ❖ Knit ten rows then hook up on the first needle to the left

- ❖ Knit ten rows and hook up floats to the right.

This will also give you a fabric that looks more like crochet than knit.

Travelling Ladders

So to make a ladder that travels;

- ❖ Transfer 2 st. move one to the left one to the right. either with the 1 prong tool=transferring or the 3 prong tool = fashioning.
- ❖ Push needles out of action.
- ❖ Knit 2 rows.
- ❖ Move 1st to the right. So you have 3 bare needles.
- ❖ Move the furthest left st back into action. Knit 2 rows.

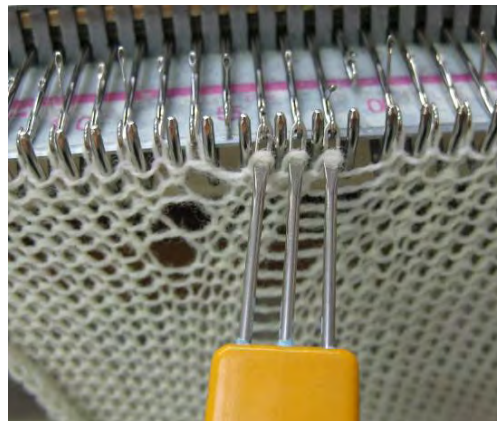

Repeat and you have a 2 st ladder travelling to the right.

- ❖ If you bring a needle back into action to pick up the loop the ladder becomes crossed.
- ❖ When you fashion a ladder the float stays straight-it doesn't cross.

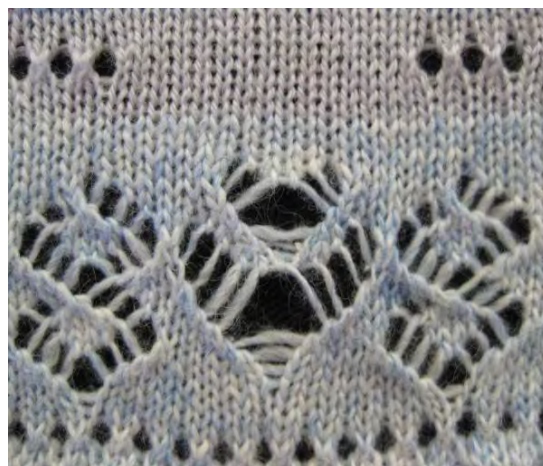

- ❖ Try a fashioned ladder. Establish the ladder by transferring out 2 st.
- ❖ Knit 2 rows.
- ❖ Now with the 3 prong tool fashion 3st on the left onto the first bare needle.

Same on the right, move the st. next to the second bare needle so these become the empty two, push back out of action.

Try These:

- ❖ inventing your own patterns combining ladders and pointelle.
- ❖ hooking up floats as you travel the ladders.
- ❖ increasing and varying the width of your ladders and the direction.
- ❖ knitting several ladders simultaneously.
- ❖ knitting ladders and pointelle from either side of the swatch and meet them in the centre.

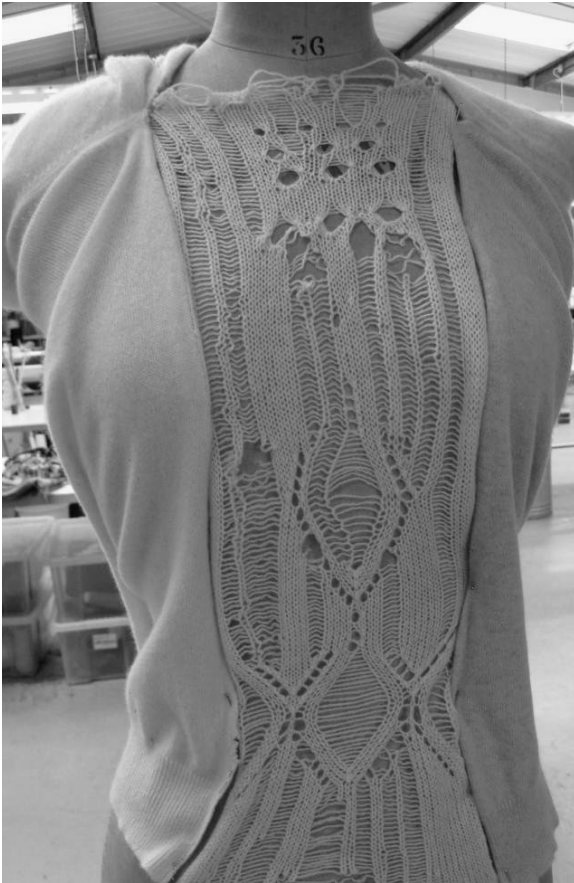

Now knit a sample where the whole fabric is covered in ladders. It is very open but with lots of movement in stitches and shapes, repeat the patterns or just randomly move stitches!

Deconstruct

Maybe take one of the regular patterns you have knitted and destroy it.

- ❖ Drop stitches and run them back down the knit, see what happens when they run into stitches you have transferred.

You might use a section of this as a design and knit again but with secure stitches for a more deconstructed look.

Use all you have learnt to make your own stitches.

**You have now designed
and made your own lace!**

Glossary

E-wrap *cast on method for finished edge loop yarn around needles from left to right making the shape of a lower case e around each needle while needles are in E position.*

Sts *stitches(abbreviation)*

Prong tool *double ended tools that come with machine either have 1 and 2, 1 and 3, 2 and 3 prongs.*

Latch tool *tool that looks like a machine needle, used for picking up stitches.*

On the left side of the needle bed on machine

Needle position;

A *non working position/ needles will not knit*

B *working position / needles will knit*

D *selected for pattern knitting/ needles will knit*

E *holding position/ needles will knit unless holding cam is switched to H or II*

HP *holding position*

WP *working or knitting position.*

Holding cam *control on carriage on Brother machines N
Or H on Knitmaster I or II. Select H and II for short row
knitting, needles selected into position E will NOT knit.*

Swatch *piece of knitting/fabric*

Pointelle *lace knitting*

Eyelet *one stitch lace hole*

1x1 pointelle *1 row of 1 stitch lace holes*

Fashion / fashioning *moving multiple stitches*

Cast off *bind off*

Dress Form *dummy/ mannequin*

Here is our story , well a particular part of it

Sue and I met at a jumble (that`s second hand clothes) sale in our village, Old Basing near Basingstoke, Hampshire in 1978 !!!

After our respective University and Polytechnic Courses we set up in Brighton in 1983. We called our label "Pretty Blue Guns" after one of our favourite Tom Waits` tracks. We were lesser known contemporaries of Body Map, John Flett, Martin Kidman of Joseph and all that crowd of British design hopefuls eons back at the dawn of time.

We were marvellously supported and encouraged by Steve & Iona Hudson, of New Masters, Kings Road, London and then by Stuart McKay & Peter Sidell (now owner of The Library, in South Kensington) of Jones of Kings Road and later Floral Street. We had US sales to Macys and Neiman Marcus and various other accounts but after about 3 years we couldn`t really make the line pay, nevertheless our garments had come to the notice of an Italian company called Agenco of Modena and as a result we got great experience for the first time working in Italy on one of their knitwear lines called Portobello`s. This and Sue`s earlier employment in the Far East with US brand Williwear gave us the necessary commercial understanding to separately work for Next , Henry Lloyd and Boules. All these were very useful experiences.

Pretty Blue Guns had also been noticed by our now long-time friends Chris Matthews & Philippa George of ` The Collection`, the design studio for whom we started producing one off knit designs in 1987 and still work with today. Our own design collection started with a first trip to New York in 1991 under the catchy banner of our combined surnames `Dykes Enticknap` which luckily in year 2000 with the on-set of the dot com age was transmuted into the rather more generic user friendly Knit-1 Ltd www.knit-1.com . Design sales were growing rapidly and we needed more space so moved to our existing premises, a 3,500 sq ft former engineering works which we completely refurbished to our design business requirements. We have sold designs to and worked with most of the big global fashion brands.

In 2008 we set up our Design Courses www.knitdesigncourses.com . Somewhat frustrated by the practical skills levels which were lacking in the portfolios of knit graduates and undergraduates we had been seeing for some time we set about devising our intensive courses. We wanted to offer a completely new way to learn knit design & make that would appeal to not just students, technicians and tutors but industry professionals, ambitious designers and knit design enthusiasts. In fact the courses appeal to any aspiring individual wanting to progress in the field of machine knit design and knitwear for the fashion industry.

The courses take place in the design business environment offered by Knit-1 Ltd at the company's well equipped premises in Brighton, UK. Many elements of the courses have references to selected high profile customers of the company which further distinguishes the courses from what can be offered by traditional academic institutions. Hence we can deliver the required practical skills to advanced levels in knitwear, knit design & make, print and embroidery in rapid time. The courses are now very well established and have proved themselves through the positive feedback received and the attainment of jobs in the fashion industry by course participants. It takes the knowledge of a fashion business to know what other businesses want from their prospective employees. Furthermore many of our participants have also set up their own businesses after taking one of our courses.

That's it so far.....
