

Knit *it* NOW

Helping you be a better machine knitter

Hand Manipulated Stitches

Cheat Sheets

*For 3.6mm, 4.5mm, 6mm, 6.5mm,
7mm, 8mm, 9mm knitting machines*

How to use these sheets

1. Determine the needle pitch of your knitting machine
(measure the space between the needles)

2. Print a copy of the page for your machine
(be sure your printer settings are not set to "scale"
or modify the dimensions of the printed image)

3. Draw your stitch pattern

4. Hold your marked sheet up to the needlebed,
aligning the 0 mark

5. Hand pull the needles needed for your stitch pattern

6. Duplicate the stitch pattern across the needlebed
as needed

7. Work your hand manipulation and continue
to follow your stitch pattern

*NOTE: These cheat sheets accompany the Knit it Now Tutorial, "Timesaving Tips for Hand Manipulation".
Available to subscribers in the Knit it Now Learning Library*

The image shows a 48x48 grid with a coordinate system. The horizontal axis (x-axis) is labeled 1 to 20 on both sides of the center. The vertical axis (y-axis) is labeled 1 to 24 on both sides of the center. A red vertical line is at x=0 and a red horizontal line is at y=0. Thick gray lines are at x=10, x=20, y=10, and y=20.

The image shows a 34x34 grid. The central 18x18 area is white, while the borders are gray. The gray borders are 3 units thick on the top, bottom, left, and right sides. A red cross is centered on the grid, with a vertical line at column 17 and a horizontal line at row 17. The grid is labeled with numbers 1 to 17 on the left and right sides, and 1 to 15 on the top and bottom sides.

A 30x30 grid with a 10x10 shaded center and a red cross. The grid is divided into four quadrants by a vertical red line at column 15 and a horizontal red line at row 15. The center 10x10 area, from column 10 to 19 and row 10 to 19, is shaded gray. The grid is labeled with numbers 1 to 15 on both the top and bottom edges, and 1 to 30 on both the left and right edges.

A 26x26 grid with a red cross. The grid is divided into four quadrants by a horizontal red line and a vertical red line. The numbers 1 through 13 are written vertically on the left and right sides of the grid, mirrored across the horizontal red line. The numbers 1 through 10 are written horizontally at the bottom of the grid, mirrored across the vertical red line. The grid is used for a logic puzzle where the numbers represent the count of black squares in each row and column.
